## Buy parts and service automobile from home.

When a person buy a new or used car, the first thing that comes to their mind is how they are going to maintain their car. Because most of the people in our country doesn't have any proper knowledge about cars. The problem about Bangladeshi car market is that the majority of the people prefers to buy reconditioned car rather than a brand new one from the authorized dealership due to high taxes and price. Therefore most of the people doesn't get any warranty support from the dealership and have to depend on the third party workshop. The problem with these workshop is that they are full of scammers. That's what people are mostly worried about when they buy a new car. Our target is to help those people to get rid of all those hassles.
